Step Up to Lead for Equity: Using Child Outcomes to Promote Equity**
Presented at Division for Early Childhood's 37th Annual International Conference
September 21, 2021

General	
Child Outcomes	The Child Outcomes section of the ECTA web site contains a wealth of resources on child outcomes measurement.
Understanding the Three Child Outcomes	
Child Outcome Step-by-Step	This video describes and illustrates the three child outcomes.
Breadth of the Three Child Outcomes	This infographic illustrates the key functional skills and behaviors in each of the three outcomes.
What is Measured and Reported	
OSEP Requirements: Reporting Child Outcomes	This document provides information on the a to e progress categories and the summary statements that states report annually to the Office of Special Education (OSEP) in the U.S. Department of Education
Converting Child Outcomes Data to OSEP Progress Categories / Summary Statements	This video explains how the child outcomes data that local programs collect are converted to the national data on child outcomes.
The Most Recent National Data	
IDEA Child Outcomes Highlights for FFY2019	This 2-page brief summarizes the latest national data on child outcomes for children receiving early intervention and preschool special education.
Using the Child Outcomes Data to Look at Equity	
Analyzing Child Outcomes Data for Program Improvement: A Guidance Table	This document presents a series of questions, including questions about equitable service delivery and equitable outcomes, that state and local programs can use to drive program improvement. Guidance is presented on how to analyze data and report and describe the results for each question.
Using Child Outcome Data to Understand Equity	Presenters in this conference session guided participants through how to identify critical questions related to equity and child outcomes and how to develop analyze plans to answer these questions
