Summary of Assessment Information for Outcome 1 for Kim

From observation and parent report

Kim tantrums 1-3 times daily when she cannot communicate her desires, especially to her sister Jana (5 1/2 years old), since Kim is very motivated to play with her. Kim both initiates and reciprocates play interactions with adults and other children. She picks up and hands others books to read or toys to play with. She seeks the attention of her family "Look Kim." When other children visit, Kim wants to play, but motorically cannot keep up. She needs a lot of adult facilitation and direction to imitate what the other children are doing. She loves making noises and shaking noisy toys. She laughs easily and cries when frustrated.

From parent report

- Kim likes to play on the living floor with Jana. She does so several times a day. Jana likes to interact with Kim during the play time, looking at books together or handling toys. When Jana doesn't understand a vocalization, Kim gets frustrated and Jana walks away, often resulting in Kim's temper displays and crying
- She likes to play with Jana and the neighbor children. However, she needs adult support to interact. She is often frustrated and cries when the children don't understand her. Jana is usually willing to play and figure out what Kim wants, but not when the other kids are visiting.
- Kim loves water play.
- Kim enjoys being with most adults, especially her grandparents.

From E-LAP

Social-Emotional: (*E-LAP-33 months) Kim seeks and is motivated by praise; enjoys interacting with others, and is strongly attached to her parents, sister and maternal Grandparents. She is very interested in

playing with other children. She cries and fusses when she is not understood. She can be soothed by reassurance and problem-solving. She is happy and often pleased with her activities. “Kim good girl.” She is somewhat shy with new adults but warms to them quickly.
