

# Training Activity Instructions

1

**Name of Activity:** Which Outcome Is It?

**Preparation Time:** 10 minutes

**Activity Time:** 5-10 minutes

**Preparation:**

1. Insert the Outcomes Jeopardy PPT slide into the Power Point presentation to be used during training.

**Activity Instructions:**

1. Prepare the participants for the activity by saying, "Let's make sure that we're all clear about which skills and behaviors are included in each outcome area."
2. Display the first slide. Paraphrase the contents of the slide, providing more information if participants do not immediately respond.
3. Check for consensus ("Does everyone agree? Are there other ideas?") before clicking to reveal the answer.
4. Repeat for the other outcome areas.
5. Debrief with the participants by asking,
  - Are there any areas of child development you still need support to know which outcome or outcomes they relate to?
  - Do you have any questions about the definitions of any of the outcome areas?

**Activity Variations:**

- Turn this section of the slide presentation into a game. Offer the first person who answers a treat (such as candy or small door prize).
- Alter the PPT slides to include animation, so that one statement at a time is revealed upon the mouse click. Only uncover as many as is needed to elicit a correct answer from the group. Reveal the rest of the information on each slide after the correct answer is given.
