

## Child-Child Interaction Checklist

This checklist includes practices that can be used to encourage and support peer interactions to promote positive interactions and play by responding promptly and positively (contingently) to the child's behavior. The adult behavior include things both to reinforce mutually interesting and enjoyable peer interactions and to promote and enhance child interactive competencies. The adult behavior can be used as part of planning interactive episodes (e.g.,

play groups) and as part of naturally occurring child-child play during everyday activities.

The checklist indicators can be used by a practitioner to develop a plan to use the practices with a child or to promote a parent's use of the practices. The checklist rating scale can be used to do a self-evaluation to determine if the different practice characteristics were used by a practitioner with a child or as part of promoting a parent's use of the practices.
