- Readiness Teams
- Part of SSIP Collaboration Team
- Early Childhood Integrated Data System

Delaware

MIECHV

- Data – conduct ASQ screenings and refer high risk to CDW

ECES

- Data – integration of ASQ and PEDS data sets. Referrals to CDW

- Positive Outcome
 - Increased number of screenings– no longer at bottom of ranking, now in middle. Nemours Pediatric Satellite Clinics screen as part of their own EMR and electronic referrals made to CDW.
- Areas Needing Improvement
 - Has been no integrated database between PEDS and ASQ –not tracking screenings by child across screenings to avoid duplication.
 - After PEDS and ASQ screenings – needs comprehensive tracking system that referral made to CDW. Many PCPs have EMR that doesn't link directly to CDW.

Burning Question: Are children getting screened and identified earlier have better outcomes?

Integrated database

Continued interagency collaboration

Efforts should impact Campaign for Grade Level Reading in Partnership with Annie E. Casey Foundation

Effort should improve outcomes initiated by the Wilmington Community Advisory Council to reduce violence and improve outcomes for those who have experienced adverse childhood experience.
