Enhancing Recognition of High-Quality, Functional IFSP Outcomes and IEP Goals:

A training activity for Infant and Toddler service providers and ECSE teachers

By Anne Lucas, Kathi Gillaspy, Mary Louise Peters and Joicey Hurth with support from Dathan Rush and M'Lisa Shelden, Family, Infant and Preschool Program

Background

This training activity was created to support participants' understanding of the criteria needed to develop and write high quality, participation-based IFSP outcomes and IEP goals. The term "functional" is often used to describe what outcomes and goals ought to be, yet many providers struggle to define what makes a goal "functional." Still others struggle with making goals and outcomes meet the criteria set forth in regulations, as well as have meaning for families. A review of existing resources developed by national experts provided a framework for considering both IFSP outcomes and IEP goals to determine if the goals are high quality and support the child's participation in everyday routines and activities.

The key to supporting the development of high quality, participation-based outcomes is creating a clear and deliberate link between every step of the IFSP/IEP process, beginning with interactions with the family during initial contacts and referral through the development of the IFSP/IEP, and beyond. Critical to this process is the fundamental belief that children learn best through their participation in everyday activities and routines with familiar people. Also critical to this process are three important skills for providers:

- The ability to understand how to gather information from families throughout the process,
- The ability to conduct a functional assessment that gives a clear picture of the child's abilities and needs in the child's natural, everyday settings, activities and routines, and
- The ability to use the information to develop goals and outcomes.

Throughout the process of gathering information from families, special attention should be paid to the information the family shares about what's working well for them, as well as what is challenging. When paired with the provider's knowledge of early development and functional assessment occurring in multiple situations and settings, and over time, information from families provides all that is needed to develop high quality, participation-based outcomes and goals.

Criteria Defining High Quality, Participation-Based Outcomes and Goals

A. IFSP Outcomes

The National Early Childhood Technical Assistance Center reviewed expert-generated resources and identified six key criteria that define IFSP Outcomes as high quality and participation-based. They are:

- The outcome statement is necessary and functional for the child's and family's life.
- The statement reflects real-life contextualized settings (e.g., not test items).
- The wording of the statement is jargon-free, clear and simple.
- The outcome is discipline-free.
- The statement avoids the use of passive words (e.g., tolerate, receive, improve, maintain).
- The wording emphasizes the positive.

When the child's contextual information is available (e.g., assessment information, the child's IFSP) the following IFSP outcome criteria should also be evaluated:

- The outcome is based on the family's priorities and concerns, and
- The outcome describes both the child's strengths and needs based on the information from the initial evaluation or ongoing assessment.

B. IEP Goals

The National Early Childhood Technical Assistance Center used nationally respected sources to identify six key criteria for evaluating the quality of IEP Goals. These include:

- The goal describes how the child will demonstrate what s/he knows.
- The goal is measurable and observable. Clear strategies and/or accommodations are included.
- The goal describes the conditions in which the child will demonstrate progress, and does not name a placement or educational environment.
- The goal is written in plain language and is jargon-free.
- The goal describes the child's involvement in age-appropriate activities to address "academic and functional" areas.
- The wording of the goal emphasizes the positive.

When the child's contextual information is available (e.g., assessment information, the child's IEP), the following IEP Goal criteria should also be evaluated:

- The goal includes what the child is doing now and includes the family's input and concerns.
- The goal is achievable in one year and specific timelines are noted.
- The goal details special factors related to communication, assistive technology and support specific to the child's disability and/or English language learning.

IFSP Outcomes Rating Activity

A. Materials Preparation

- 1. The IFSP Outcome Cards (Appendix A on page 7) contains 22 IFSP outcome statements (two per page). Print the outcomes statements on card stock and cut on lines indicated for a 4 x 6" card, or print on plain paper and glue to 4 x 6" index card.
- 2. One set of outcome statements will make 22 cards. One set of 22 cards goes with each placemat. Make as many sets as needed for the groups completing the activity.
- 3. Print the IFSP Outcomes Placemat (Appendix B on page 19) on a sheet of 8½ x 11" paper and laminate.

B. Activity Instructions

- 1. Give one placemat and one set of 22 outcome statement cards to each group. **Be sure to shuffle the cards** so that outcome statements are not in the order they are on the answer key.
- 2. Have each group put a card in the center of the placemat so that the printed grid on the card matches up with the placemat (shown below).

The OUTCOME is necessary and functional for the child's	Criteria for Rating IFSP Outcomes	The wording of the OUTCOME is jargon-free,
and family's life.	IFSP Outcome Card 1	clear and simple.
The OUTCOME is discipline-free.	Nolan will play with toys with his sister during bath time.	The wording of the OUTCOME emphasizes the positive.
The OUTCOME reflects real-life contextualized settings (e.g., not test items).	When the child's contextual information is available, the following IFSP outcome criteria can also be evaluated: • The outcome is based on the family's priorities and concerns. • The outcome describes both the child's strengths and needs based on information from the initial evaluation or ongoing assessment	The OUTCOME avoids the use of passive words (e.g., tolerate, receive, improve, maintain).

- 3. Within each small group, have the participants discuss and rate the outcome statement by writing "yes" or "no" in each quadrant, based on whether the statement meets each of corresponding criteria.
 - NOTE: The criteria described in the bottom center box of the placemat should not be rated during the training activity. Be sure to tell participants that they are criteria to be considered when the child's IFSP and assessment information is available, but for the purposes of the activity, they are reference information only.
- 4. Repeat for each card.
- 5. Have them separate the cards into "high-quality" statements and "substandard" statements. Any statement with a "no" in any quadrant goes into the "substandard" pile.
- 6. Pass out the IFSP Outcomes Answer Key in Appendix C on page 21 of this document. Ask your participants to compare their answers with the answer key.
- 7. Debrief with the group, asking questions such as:
 - Where did you get stuck with an outcome statement? (listen for varying interpretations of the criteria)
 - How might this activity help you in your work and within your team?
 - What additional supports do you need to help you successfully identify whether or not an IFSP Outcome is of high quality and is participation-based?

Other questions may be added to the debriefing by those using the activity to fit the context of the participants and their learning needs.

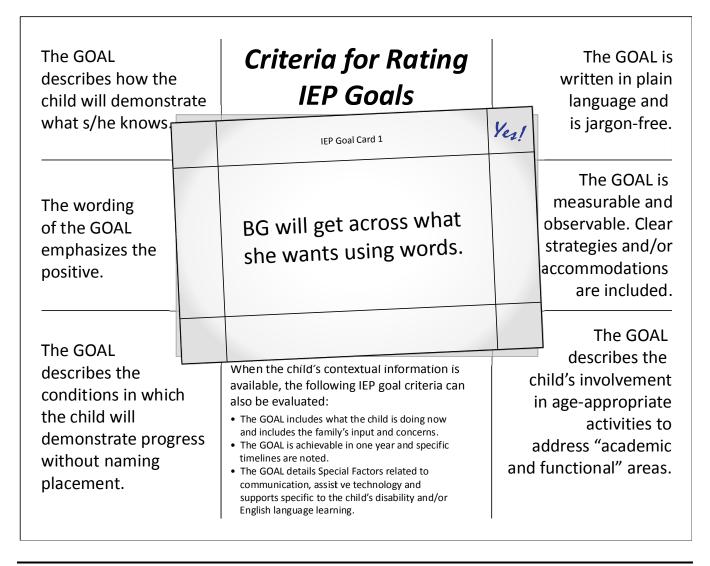

IEP Goals Rating Activity

A. Materials Preparation

- 1. The IEP Goal Cards (Appendix D on page 24) contains 24 IEP goal statements (2 per page). Print the goals statements on card stock and cut on lines indicated for a 4 x 6" card, or print on plain paper and glue to 4 x 6" index card.
- 2. One set of goal statements will make 24 cards. One set of 24 cards goes with each placemat. Make as many sets as needed for the groups completing the activity.
- 3. Print the IEP Goals Placemat (Appendix E on page 37) on a white piece of 8½ x 11" paper and laminate

B. Activity Instructions

- 1. Give one placemat and one set of 24 cards to each group. **Be sure to shuffle the cards** so that goal statements are not in the order they are on the answer key.
- 2. Have each group put a card in the center of the placemat so that the printed grid on the card matches up with the placemat (shown below).

- 3. As a small group, have the participants rate the statement by writing "yes" or "no" in each quadrant, based on whether the statement meets each of the corresponding criteria.

 NOTE: The criteria described in the bottom center box of the placemat should not be rated during the training activity. Be sure to tell participants that they are criteria to be considered when the child's IEP and assessment information is available, but for the purposes of the activity, they are reference information only.
- 4. Repeat for each card.
- 5. Have them separate the cards into "high-quality" statements and "substandard" statements. Any statement with a "no" in any quadrant goes into the "substandard" pile.
- 6. Pass out the IEP Goals Answer Key in Appendix F on page 39 of this document. Ask your participants to compare their answers with the answer key.
- 7. Debrief with the group, asking questions such as:
 - Where did you get stuck with a goal statement? (listen for varying interpretations of the criteria)
 - How might this activity help you in your work and within your team?
 - What additional supports do you need to help you successfully identify whether or not an IEP Goal is of high quality and is participation-based?

Other questions may be added to the debriefing by those using the activity to fit the context of the participants and their learning needs.

Using the Rating Activity

The rating activity is designed to be used in multiple ways with different kinds of groups. It may be used by groups that are either familiar with the IFSP or the IEP or in groups where participants are mixed in their experience. In those situations, it is suggested that less familiar participants sit at tables with others who are familiar with the IFSP or IEP, so that they can work through the criteria together. The recommended group size is 3-6 people.

In the instances where this activity will be used with both groups, the IFSP and IEP placemats may be printed on the same paper (front and back) and/or laminated for durability.

NOTE: The placemats included in this publication are $8\frac{1}{2} \times 11$ " in size so that they may be printed on any standard printer. Large placemats measuring 11×17 " in size are available for download from the following URL: http://www.nectac.org/~pdfs/pubs/rating-ifsp-iep-training-large.pdf

Alternate Activity

Blank worksheets have been provided for both the IFSP Outcomes and the IEP Goals. These documents are available in Appendices G (on page 43) and H (on page 46). Provide copies of the worksheets to participants or groups with or without using the placemats or cards.

In this version of the rating activity, participants write "yes" or "no" in each box under the criteria to rate outcomes or goals. Participants can then compare their answers with the IFSP Outcomes Answer Key (Appendix C on page 21) or the IEP Goals Answer Key (Appendix F on page 39).

IEP Goals Answer Key

Participation-based, High Quality (Yes) vs. Skills-based, Substandard (No) Answer Key to Activity on Rating IEP Goals

Rating Criteria:¹

- The GOAL is written in plain language and is jargon-free.
- The GOAL describes the child's involvement in age-appropriate activities to address "academic and functional" areas.
- The wording of the GOAL emphasizes the positive. 4.
- The GOAL is measurable and observable. Clear and strategies and/or accommodations are included.
 - The GOAL describes how the child will demonstrate what s/he knows.

5.

The GOAL describes the conditions in which the child will demonstrate progress without naming placement.

		Participatio	n-based and	High Quality	Participation-based and High Quality — YES or NO?	
Sample IEP GOALS	1. Plain language; jargon free	2. Age- appropriate activities	3. Positive wording	4. Measureable and observable	5. Describes how the child will demonstrate what s/he knows	6. Describes conditions; does not name placement.
1. Given support by a familiar adult, Jayne will play in variety of ways (showing play interactions such as pretending to cooking, playing with dolls, cars, or blocks, using paints or crayons), and showing at least two play interactions each day.	Yes	Yes	Yes	Yes	Yes	Yes
2. When sitting in a chair with arms or other support (pads and a footrest), Ellie will feed herself using a spoon for at least half of the meal-time.	Yes	Yes	Yes	Yes	Yes	Yes
3. With verbal reminders, Juan will put on his jacket by himself each day before going outside.	Yes	Yes	Yes	Yes	Yes	Yes

When the child's contextual information (medical or developmental information, evaluation results, family information, etc.) is available, the following IEP goal criteria can also be evaluated:

- The GOAL is achievable in one year and specific timelines are noted.
- The GOAL details Special Factors related to communication, assistive technology and supports specific to the child's disability and/or English language learning.

The GOAL includes what the child is doing now and includes the family's input and concerns.

			Participatio	n-based and	Participation-based and High Quality	- YES or NO?	
Samı	Sample IEP GOALS	1. Plain language; jargon free	2. Age- appropriate activities	3. Positive wording	4. Measureable and observable	5. Describes how the child will demonstrate what s/he knows	6. Describes conditions; does not name placement.
4.	Using cards or pictures, Jordan will play games with an adult and one other child to both ask and answer questions, (such as –"I am round and red and you eat me—What am I?").	Yes	Yes	Yes	Yes	Yes	Yes
5.	When asked what he wants, Nathan will use words and/or gestures, including refusals (no, don't like it) to convey needs and wants most of the time (4 out of 5 times) each day.	Yes	Yes	Yes	Yes	Yes	Yes
9	When given two items or tasks, Nathan will choose by reaching for the object or picture he wants 3 out of 4 times each day.	Yes	Yes	Yes	Yes	Yes	Yes
7.	Mattie will play by showing interest, trying new ways to play with a toy, or exploring other toys for 5 minutes at a time.	Yes	Yes	Yes	Yes	Yes	Yes

IFSP Outcomes Worksheet

Participation-based, High Quality (Yes) vs. Skills-based, Substandard (No) Rating Sheet for IFSP Outcomes

Rating Criteria:

- The OUTCOME is necessary and functional for the child's and family's life.
- The OUTCOME reflects real-life contextualized settings (e.g., not test items).
 - The OUTCOME is discipline-free.
- 4. The wording of The OUTCOME is jargon-free, clear and simple.
 - 5. The wording of The OUTCOME emphasizes the positive. 6. The OUTCOME avoids the use of passive words (e.g., tol.
- The OUTCOME avoids the use of passive words (e.g., tolerate, receive, improve, maintain).

San	Sample IFSF Outcomes	Necessary/	Real-life	Discipline	Jargon-	Positive	Not
		Functional	Contextual Settings	-Free	Free		Passive
1.	1. Lily will go fishing with her family and hold her own fishing pole.		D				
2.	Romeo will go visit grandma and ride in his car seat all the way to her house.						
3.	Kimmie will play with her toys so Grandma can cook breakfast and get the older kids off to school.						
4.	4. Leroy will play together with his brother and express himself without hitting.						
5.	Kamika will sleep through the night.						
9.	6. Marcus will play in the backyard getting around on his own using his walker.						
7.	Walker will make some friends at story time at the library.						
8.	Phu will eat enough food so he can gain weight and not have to have surgery.						

When the child's contextual information (medical or developmental information, evaluation and assessment results, family interview, etc.) is available, the following IFSP outcome criteria can also be evaluated:

The OUTCOME is based on the family's priorities and concerns.

The OUTCOME describes both the child's strengths and needs based on information from the initial evaluation or ongoing assessment.
