

Natural Environment Learning Opportunities Checklist

This checklist includes the types of environmental events/factors and adult (parent or practitioner) practices that can be used to engage children in everyday activities to encourage and sustain child learning in the activities. The checklist practices include a mix of interest-based child learning opportunities and adult positive (contingent) responsiveness to sustain child participation in the learning activities.

The checklist indicators can be used by a practitioner to develop a plan to use the practices with a child or to promote a parent's use of the practices. The checklist rating scale can be used to do a self-evaluation to determine whether the different practice characteristics were part of using the practices with a child or promoting a parent's use of the practices.
