

# Transitioning from Part C to Part B: Same Agency

Ginger Elliott-Teague, Ph.D & Erik Friend, Part B & C Data Managers for Oklahoma

2016 Improving Data, Improving Outcomes Conference, New Orleans, LA  
August 2016

## Oklahoma's Part C Arrangement

## Notes on Transition Data

- SoonerStart uses an antiquated database in which all transition records are stored but which has few rules of completion to ensure high quality data.
- Part B has not used data from SoonerStart to inform transition.
- 619 data management has been weak with only intermittent staff coordination.
- All this will change soon...hopefully!

## Upcoming System Changes

- Current statewide IEP database system will incorporate a SoonerStart module...
  - To serve as the IFSP system of record;
  - To increase compliance and improve monitoring at every level;
  - To monitor program participation and student outcomes from birth to 21 (using a unique ID); and
  - To improve C to B transition practices *and* data sharing.

## Data to be Shared in Data System

- Transition records
  - Referral information, including TPC details and contact logs
  - Compliance and delay directly monitored
- COSF ratings and dates
- Evaluations and assessments, as part of IFSP file
  - Will be visible to LEA administrator for eligibility determination and teacher of record for IEP development.

## Upcoming Operational Changes

- Hiring (and retaining!) a new 619 Coordinator/Early Childhood Specialist to:
  - Train on ECOs, transition and environments for both LEAs and SoonerStart to ensure continuity of practice;
  - Assist with improvement strategy implementation on the Part B SSIP;
  - Assist with performance and compliance monitoring in the areas of early childhood education, including timeliness of transition; and
  - Assist data managers with improving EC data across Parts C & B.
