

Integrating Child and Family Outcomes into the Individualized Family Service Plan (IFSP) Process *

*The purpose of this chart is to assist states in integrating outcomes into the IFSP process through the use of evidence-based practices but it does not include all federal statutory and regulatory requires related to the IFSP process.
Text in red font indicates information related to the inclusion of the global child and family outcomes measurement; black font indicates IFSP steps leading to the development and implementation of individual child and family IFSP outcomes.
