### Online Training Resources

- **Understanding the Illinois Child Outcomes Process** is an online training offered by the Illinois Early Intervention Training Program. It includes two online modules designed to inform and support early intervention professionals in their role in the Illinois Child Outcomes Process. Successful completion of both online modules and the accompanying quiz is required for credit. Individuals who successfully complete this curriculum may enroll for the face to face session offered by the Illinois Early Intervention Training Program entitled "Child Outcomes in Action." Please visit our "Training" page to register for this event.
- **Child Outcomes Resource Module** is a module from the Illinois Early Intervention System Overview online training that is offered as a resource for individuals to review as needed. This module focuses on IFSP meeting activities related to the completion of the three statewide child outcomes and it includes an interactive animation related to child outcomes.
- **Child Outcomes Summary (COS) Process Module: Collecting & Using Data to Improve Programs:** This free online module series from DaSy and ECTA provides key information about the COS process, and the practices that contribute to consistent and meaningful COS decision-making.
- **Understanding Young Children's Development** - A series of modules discussing early childhood development as it relates to the different child outcome statements that are the focus of the Office of Special Education Programs' (OSEP) accountability reporting requirements for state Part C Early Intervention and Part B/619 Early Childhood Special Education programs. Content developed by the University of Connecticut A.J. Pappanikou Center for Excellence in Developmental Disabilities Education, Research, and Service and adapted by EITP.
  - **A Focus on Positive Social Emotional Skills** - This online module will review general principles of child development pertaining specifically to the acquisition of social-emotional skills, further examine several traditional approaches to organizing child development information, and allow participants the opportunity to hone observational skills related young children's development.
  - **A Focus on Children's Acquisition and Use of Knowledge and Skills** - This resource continues the narrative on early childhood development begun in the first module and focuses on children's acquisition and use of knowledge and skills.
  - **A Focus on Children's Ability to Take Appropriate Action to Meet Needs** - This final module in the Understanding Young Children's Development series continues the narrative on early childhood development and focuses on children's ability to take appropriate action to meet their needs.
